SBE, Inc. Reports on its 2006 Year End Results

March 30, 2007 – For immediate release

Barre, Vermont: Today, March 30, 2007, SBE Inc. (dba S B Electronics) is announcing its results for its 2006 Fiscal Year. Sales for the period were \$2,618,000, a 2.8% decrease from FY2005. Reduction of Taser International shipments during 2006 was significantly larger than the overall decrease in yearly sales of \$75,000. The remaining business increased, but not enough to fully overcome the Taser decrease. Taser's business slowdown is well documented on its web site www.taser.com, however as we began 2007, bookings for Taser were on the increase and we expect that Taser will contribute to year-over-year growth for 2007.

The company posted significant losses during the FY 2006 primarily due to investments in its new Power Ring technology and market development. These efforts have been extremely successful but we do not expect, for some time, sufficient revenue to fully offset development expenses. However, growth in Power Ring products is looking much stronger for 2007 so we expect losses to be greatly reduced for the coming year. Additionally, the SBE Division, which includes the Taser products, has made a number of cost reductions to increase profitability. Combined with the expected growth across many product lines for 2007, we expect that the SBE Division will greatly contribute to the overall performance and significantly reduce overall corporate loss for the coming year.

Audit of SBE's 2006 financials will be completed during the second quarter of 2007. All investors in the company receive a copy of the audit once it becomes available.

Because of significant capital needs to fund the Power Ring™ technology, SBE Inc. has been raising additional growth funds by selling Series B Preferred Stock to qualified investors. This year long effort was very successful. A separate press release is forthcoming on the results of this offering.

SBE, Inc. designs and manufactures capacitors and capacitor assemblies for the electrical and electronics industries from its facilities in Barre, Vermont. Originally a Sprague Electric plant, SBE has been a leader in the film capacitor market for over 50 years producing more than two billion capacitors in the facility. The company continues to produce many of its widely-recognized Orange Drop® products while developing exciting LEADING EDGE TECHNOLOGY in the field of High Energy, Pulse Current, and High Voltage capacitors.
