SB Electronics announces a 2-Year Extension to its Exclusive Agreement with Taser International valued at over \$1.5 Million

August 11, 2004 - For Immediate Release

Barre, Vermont: SBE Inc (dba S B Electronics) announced today the signing of a 2-year extension to its Exclusive Agreement with Taser International. The terms of the agreement calls for SBE to be the exclusive supplier of Capacitors to Taser International on all of their products worldwide and it has now been extended until December 2006. This includes existing Capacitors already being supplied to Taser International as well as any new Capacitors that Taser will require as they continue their successful market penetration of new Non-Lethal weapons for a variety of requirements: Law Enforcement, Military, Homeland Security, and Consumer Protection.

Taser uses SBE's Patent Pending technology in the field of Pulse Power Capacitors. This technology allows extremely large current pulses to be discharged from small capacitors and is a critical component in the operation of a stun gun. By utilizing SBE's new technology, Taser was able to reduce the size of the Capacitor in its flagship M26 Stun Gun by over 50%. This size reduction was critical in the launch of Taser International's newest product, the X26, a much smaller and lighter stun gun, with 15% more "stopping power" than the M26.

The contract extension has an estimated value of over \$1.5 Million during the 2-year period based on the current requirements and expected growth rate of Taser's Stun Gun in the marketplace.

Ed Sawyer, President and CEO of SBE stated "SBE has been supplying capacitors to Taser International since mid 2002 when they came to us to help them further improve the reliability of their M26 products." Sawyer continues, "This agreement solidifies our existing partnership with Taser and shows the confidence that Taser has in SBE's recently developed technology. It helps validate our strategy of developing unique capacitor technology which address specific customer applications and allows both SBE and its customers to provide proprietary solutions to the marketplace."

"This contract means more manufacturing and technical jobs here at SBE for the foreseeable future." Sawyer further explains.

SBE Inc. designs and manufactures Capacitors and Capacitor Assemblies for the Electrical and Electronics Industries from its facilities in Barre, Vermont. Originally a Sprague Electric Plant, SBE has been a leader in the Film Capacitor market for over 50 years producing over a Billion Capacitors over the years in the facility. The company continues to produce many of its industry leading standard Orange Drop® products while developing exciting new technology in the field of High Energy, Pulse, and High Voltage Capacitors. More information is available on our website www.sbelectronics.com.

Taser International is a publicly-traded company with the symbol TASR. Located in Phoenix, Arizona, the company is the world's leading supplier of non-lethal stun gun technology used by police, military, and security personnel worldwide. More information is available from their website www.taser.com.
